

## How to turn off Compatibility View in Internet Explorer

When using the RUSS application, you may get a Javascript Error like the one shown below. If this happens, you should disable Internet Explorer's Compatibility View. The icon is next to the address field at the top of the browser and looks like a torn sheet of paper.

### Internet Explorer 9 & 10

When the icon is blue, Compatibility View is enabled:

*Compatibility View Enabled*

To disable Compatibility View, click the icon.

*Compatibility View Disabled*

### Internet Explorer 8

When the icon looks like a pushed in button, Compatibility View is enabled:

*Compatibility View Enabled*

To disable Compatibility View, click the icon.

*Compatibility View Disabled*
